SIZE OF GLADIOLUS BULBS. We offer Gladiolus bulbs in three sizes.

LARGE size, $1\frac{1}{4}$ to 2 inches in diameter. The best blooming size. We recommend this size for immediate results.

MEDIUM size $\frac{3}{4}$ to $1\frac{1}{4}$ inches in diameter. This size will give good bloom, but a little later than the large size.

SMALL size, $\frac{3}{8}$ to $\frac{3}{4}$ inches. These will make good blooming bulbs for another season, though some will bloom the first year, if planted early.

OUR GUARANTEE. We guarantee all stock shipped to be true to name, vigorous and healthy when received. Should any error occur in labeling or otherwise and any stock shipped eventually prove untrue, we will replace it with the true stock and you may keep the stock first sent.

TERMS. Full remittance should accompany all orders. However, we will ship C. O. D. on request, when 25 per cent of the amount of the order is paid in advance.

TRANSPORTATION. We pay delivery charges on all stock except Evergreens. Evergreens are shipped F. O. B. Dalton, N. Y.

DISCOUNTS. We allow the following cash discounts, when payment is made in full before shipment.

10 per cent on orders of \$5 to \$25.

15 per cent on orders of \$25 to \$50.

20 per cent on orders of \$50 or more.

SUBSTITUTIONS. No substitutions will be made unless your order so requests.

GLADIOLUS THRIP

Gladiolus Thrips have caused great damage to Gladiolus during the blooming season in nearly all parts of the U. S. the past two seasons.

The Thrip is a very small insect about 1-20 of an inch in length and not easily seen, except when numerous. Thrips do not overwinter out doors, where the ground freezes. The main source of infection is from planting bulbs infected with the insects. If your Gladiolus did not blossom as good as in former years, it may have been due to the Thrip and you should treat your bulbs before planting.

For treating a small number of bulbs, the simplest and most convenient method is by the use of NAPHTHALENE FLAKES. This material intermixed with the bulbs at the rate of 1 oz. to 100 large bulbs, in a paper bag or box, gives complete control. After 2 or 3 weeks all insects should be dead. Crushed moth balls can be used, if the flakes cannot be obtained.

We believe that all bulbs offered for sale should be treated to eliminate Thrip, as they may be present without it being known. We have accordingly treated our bulbs with the best known methods and we can state with confidence, that our bulbs are free from Thrips.

EVERGREENS

These are not the cheap baby evergreens that some are offering, that are shipped without ball of soil on roots and varieties you do not want. These are superior varieties, carefully packed with ball of soil and burlapped. We guarantee they will reach you in good condition. Shipped by express or freight. Delivery charges collect. Packing and boxing free.

Pyramidal Arborvitae

Pyramidal Arborvitae — This evergreen furnishes the necessary tall effect for foundation plantings. It is of rapid growth, good green color and even pyramidal habit. It may be freely cut and trimmed. 10 to 12 inch, 50c each.

Woodward Globe Arborvitae — Maintains the natural globe shape without trimming. It is especially fine for low borders, for formal uses, for tubs, urns or foundation groups. 10 to 12 inch, 60c each.

American Arborvitae — A slender pyramid with broad base. Foliage green, 12 to 15 inch, 50c each.

Andorra Juniper—A rapid growing dwarf spreading Juniper. As soon as the frost comes in the Fall, it takes on an unusually rich purple-bronze color, distinct from other evergreens. Spring and summer color is a rich bright green. Fine for rock gardens and foundation planting. 15 to 20 inch spread 75c each, 24 to 30 inch spread \$1.00 each.

Pfitzer Juniper—One of the most important spreading evergreen. It is very popular as it succeeds in exposed locations, full sun or shady places. Fine for foundation planting and rock gardens. 18 to 24 inch spread 75c each, 24 to 36 inch spread \$1.00 each.

Red Cedar—One of the oldest and most popular evergreen. It has a very close-growing compact distinctly pyramidal form. Excellent for planting on gravelly and sandy soils. 24 to 30 inch 75c each.

EVERGREENS

Concolor Fir (White Fir)—A very ornamental tall growing evergreen. It is perfectly hardy, grows in any kind of soil, but thrives best in a well drained clay or loam with gravelly subsoil. Not good for low wetground. Color of foliage varies from soft green to blue. 2½ to 3 feet \$2.50 each, 3 to 3½ feet \$3.50 each.

Colorado Blue Spruce—Beautiful silver blue color. The trees are perfectly shaped with an abundance of heavy foliage. They are hardy, healthy and sure to grow. The best of all the spruces for single tree or group planting. 2 to 2½ feet, Selected Blue \$3.50; 2½ to 3 feet, Selected Blue \$4.50; 2 to 2½ feet, Medium Blue \$2.50; 2½ to 3 feet, Medium Blue \$3.00 each; 2½ to 3 feet, Colorado Green \$1.50 each.
